securosys

Company Profile
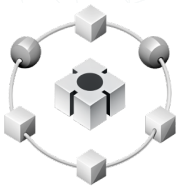

Securing the Future with Innovation and Trust

Securosys SA, headquartered in Switzerland, is a renowned industry leader in cybersecurity. We specialize in products and solutions that protect data, digital identities, as well as cryptographic keys securing transactions – thus safeguarding the reputation of organizations. With our flagship product, Securosys Primus HSM, available both on-premises and in the cloud, we help secure critical systems across diverse industries, including finance, healthcare, and government.

As pioneers in cryptographic technology, we are at the forefront of future-proofing systems, ensuring they are ready for tomorrow's challenges. Our products, including Post-Quantum Cryptography (PQC)-ready HSMs, offer the highest level of security and innovation to protect your digital assets in an ever-evolving threat landscape.

Our Commitment to Excellence and Trust

At Securosys, we want to create a digital world where data is secured, identities are protected, and privacy is guaranteed. Our mission is to safeguard our customers in cyberspace by protecting their data, digital assets, identities, and communications through innovative and cost-effective solutions. We aspire to build long-term business relationships and earn your trust through our commitment to reliability, an innovative spirit, and the exceptional quality that Swiss craftsmanship is known for.

Innovation

Constantly pushing the boundaries of technology to stay ahead of emerging security threats.

Accountability

Maintaining the highest ethical standards in protecting our clients' most valuable assets.

Reliability

Trusted by leading institutions worldwide, our solutions offer uncompromising performance and security. Manufacturing in Switzerland ensures top quality from development to production.

Expertise & Trust

All our products are developed by our in-house experts, in collaboration with trustworthy partners. We rely on our own products, ensuring reliability and trust in every solution we offer.

Customer-Centric Approach

Delivering tailored security solutions with dedicated support, ensuring our clients' needs are always met.
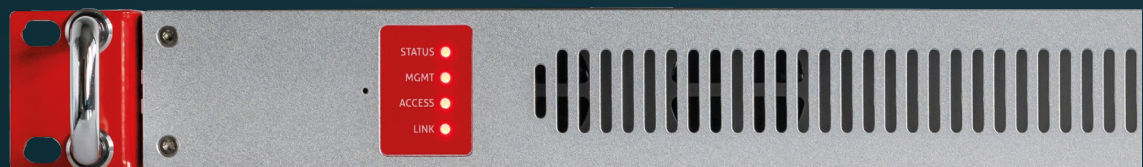

Our Solutions at a Glance

The cornerstone of our security portfolio, the **Primus Hardware Security Module (HSM),** offers enterprise-grade security for cryptographic keys, digital signatures, and sensitive data.

Our Primus HSMs guarantee secure generation, storage, and management of digital identities, encryption keys, and digital signature keys. Managed directly or with our remote access device Decanus, Primus HSMs ensure **top-tier redundant protection of all your digital assets**.

They are available both on-premises and as a cloud solution to meet diverse operational needs.
Our HSMs are **FIPS140-2 Level 3 and CC EAL 4+ EN 419221-5 eIDAS certified** to match the highest industry standards.

Seamlessly transitioning to next-generation cryptographic algorithms, **our entire range of HSMs is PQC-ready**, ensuring future-proof security for your organization.

Additional Products and Services

Decanus Terminal

Remotely manage your HSM and user partition.

Smart Key Attributes

Fortify your encryption keys security with Smart Key Attributes - Patented SKA Technology

Transaction Security Broker

Enhance financial and digital asset applications with unique transaction security.

Key Attestation

Achieve cryptographic verification of your keys and their attributes through a chain of trust originating from our root certificate.

Collaborating with industry leaders worldwide.

We collaborate exclusively with top-tier partners who meet the highest standards in the industry. No matter where you are or what you need, our extensive network of partners is here to help.

Driving Innovation Today for Tomorrow's Challenges

As the digital world evolves, so do the threats it faces. Securosys is constantly innovating to protect your systems from current and future security risks. Our Post-Quantum Cryptography (PQC)-ready solutions ensure that your organization is prepared for the quantum age, where classical encryption may no longer suffice.

We are committed to providing the technology and expertise needed to protect your most critical assets now and in the future.

Let's Secure the Future Together

Contact us today to discover how Securosys can help you secure your data, transactions, and reputation with industry-leading solutions.
